

FTM Driving Simulator

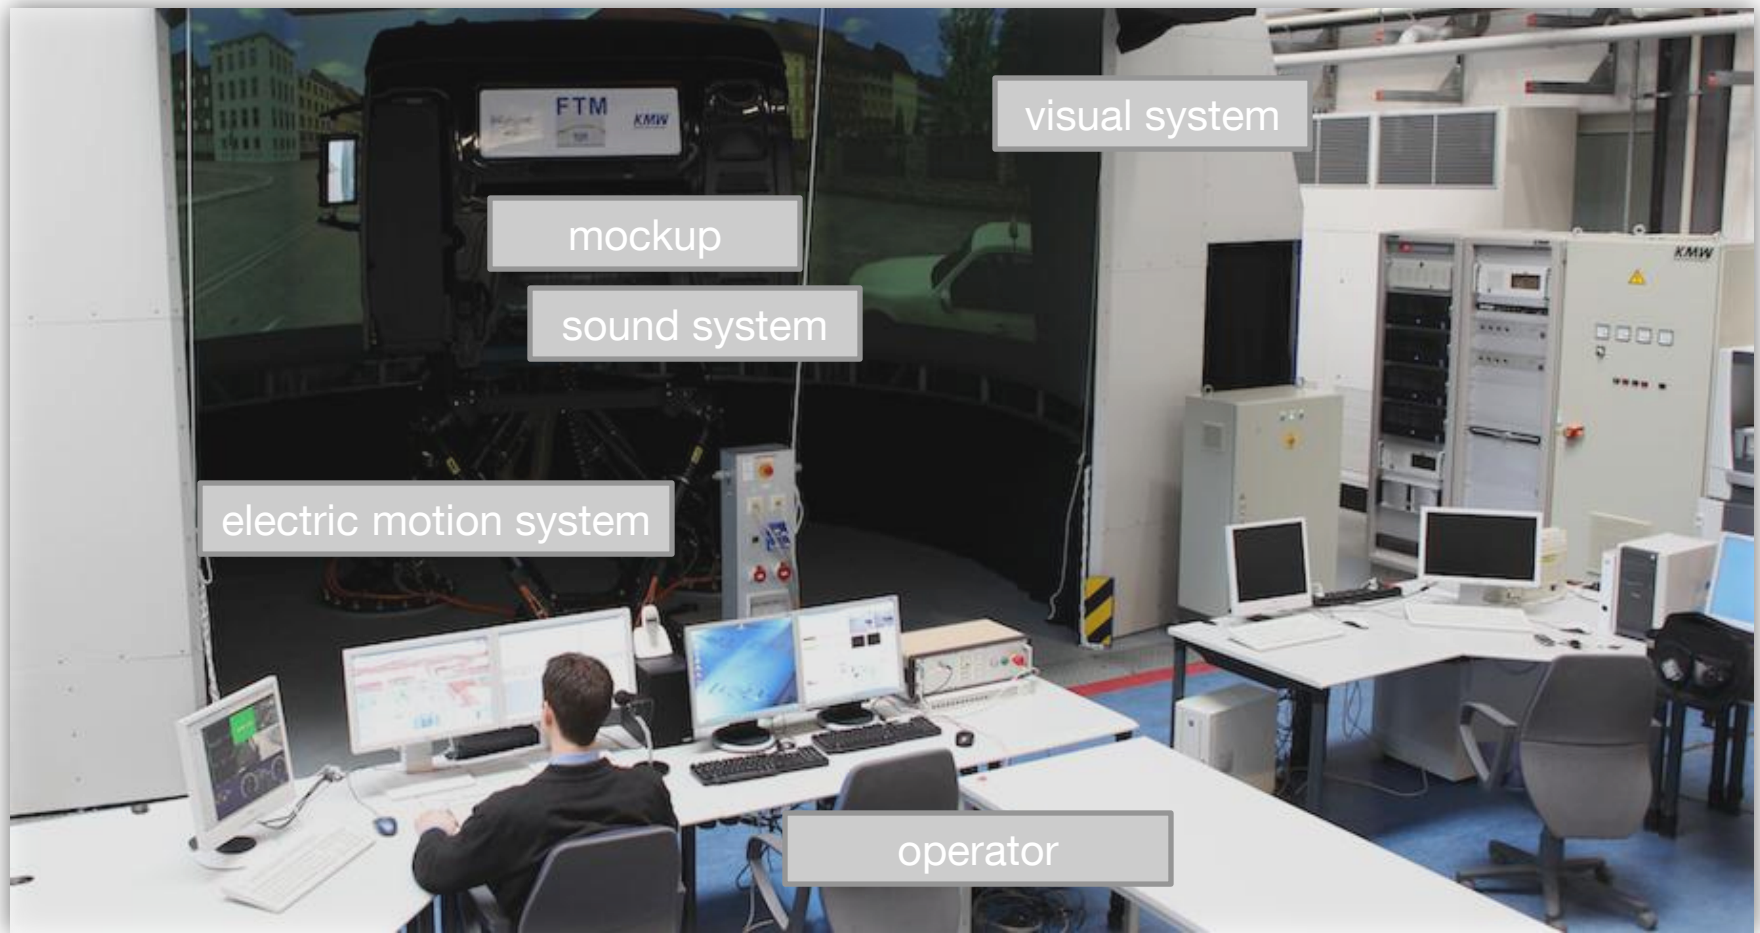

FTM Driving Simulator

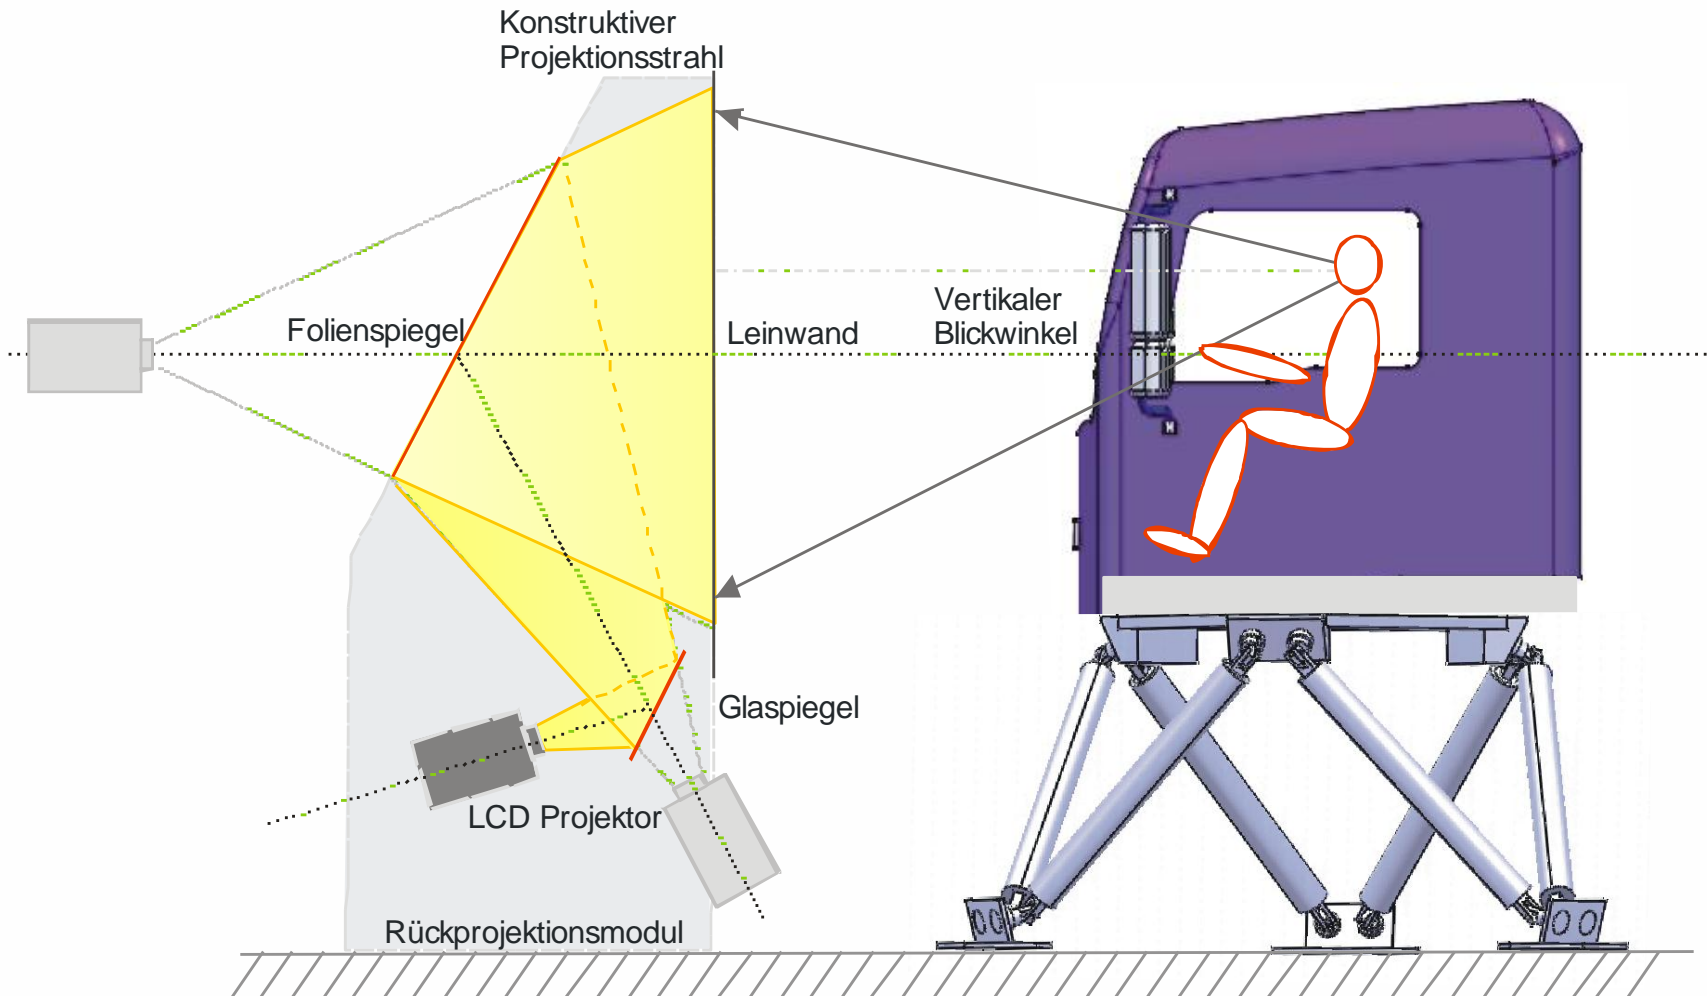

- Full equipped MAN TGS cabin (mockup exchangeable)
- Representation of driving dynamics by 6-DOF electric motion system
- Visual system with seamless panorama view
- Modular measurement equipment for synchronous data recording

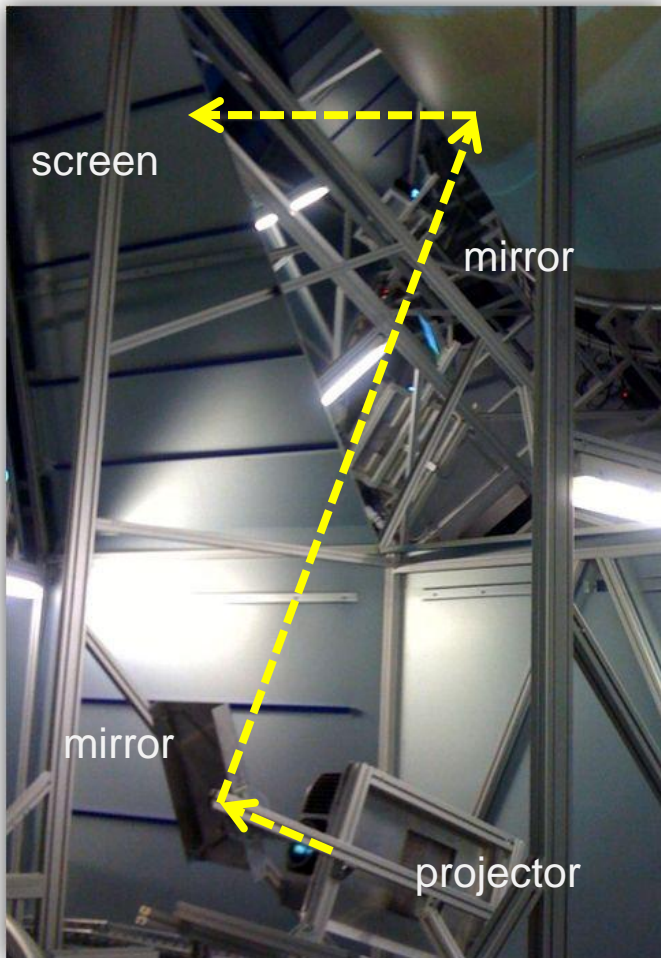

FTM Driving Simulator

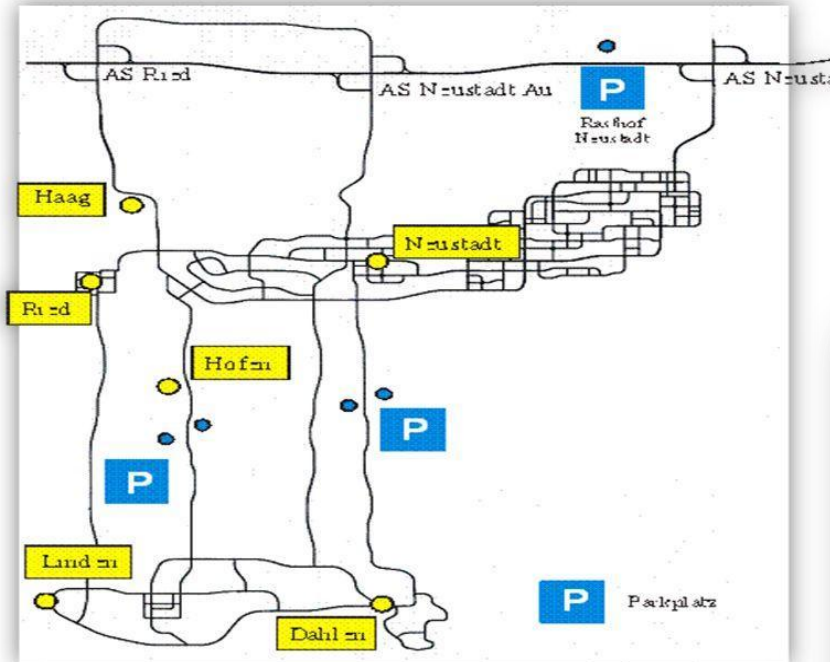

FTM Driving Simulator

FTM Driving Simulator

FTM Driving Simulator

preparation of diversified, realistic scenarios by

- programmable vehicles, individuals, animals
- simulation of different weather conditions (snow, rain, fog) and time of day
- static objects (e.g. objects of interest, billboards, traffic signs)
- manifold trigger conditions (stationary, time-to-collision, distance, external)
- additional, investigator-operated vehicle for complex driving situations
