

101st Annual Meeting of the Transportation Research Board, Washington, D.C. January 9-13, 2022

# Doctoral Research in transportation analysis, planning and policy

Sunday, January 9th, 2022, 1:30 PM - 5:00 PM

Walter E. Washington Convention Center, Room TBD

Rolf Moeckel (Technical University of Munich) and Patricia Mokhtarian (Georgia Institute of Technology), presiding

Submissions due by Friday, August 27th, 2021.

At this workshop, PhD students conducting research in transportation policy, planning, analysis methods and modeling tools are invited to present their work and discuss issues and questions they encountered. The workshop is co-sponsored by the Standing Committees of the Section Transportation Planning and Analysis (AEP00). The workshop will be held in person on Sunday afternoon (January 9th, 2022) at the 101st Annual Meeting of the Transportation Research Board in Washington, D.C. Reports of recently completed, or nearly completed, PhD dissertations and research-in-advanced-stages are invited.

Individuals who wish to present their research need to submit a 500-word summary of their research including the title and complete author information, along with a letter of nomination from their faculty advisor. The letter of the advisor shall explain the significance of the contribution and clearly state the anticipated graduation date. The abstract, even if setting a broad context of the entire PhD topic, needs to be clear about what specifically the candidate intends to present at the workshop. Documents in PDF format need to be uploaded at <https://wiki.tum.de/display/tbforms12/Doctoral+Workshop+at+TRB>. The deadline for submission of entries is Friday, August 27th, 2021 (end of day in any time zone).

Those who have presented their dissertation research at this session in previous Annual Meetings of the Transportation Research Board are not eligible to submit entries. Please note that there is a separate Doctoral Dissertation Research session devoted to the field of Transportation Operations and Traffic Control. Work that falls primarily in that domain should be submitted there. The workshop on Transportation Operations and Traffic Control is organized by Dr. Michael Knodler ([mknodler@umass.edu](mailto:mknodler@umass.edu)) from the University of Massachusetts at Amherst.

The selection of presentations for inclusion in the program will be based on the total number of submissions received, whether the work is based on completed or in-progress research, and whether papers based on the dissertation research have been accepted for presentation in other lectern or poster sessions of the Annual Meeting. All submissions will be reviewed and notifications regarding acceptance are planned to be sent out by early-October. Accepted presentations will be listed by title and author in the Annual Meeting Program.

The workshop will be held in person and it is not possible to attend remotely. For questions, please contact Patricia Mokhtarian ([patmokh@gatech.edu](mailto:patmokh@gatech.edu)) or Rolf Moeckel ([rolf.moeckel@tum.de](mailto:rolf.moeckel@tum.de)). Updates on this workshop will be posted at <https://www.msm.bgu.tum.de/workshop/>.
